

EIRIGAMI-1:

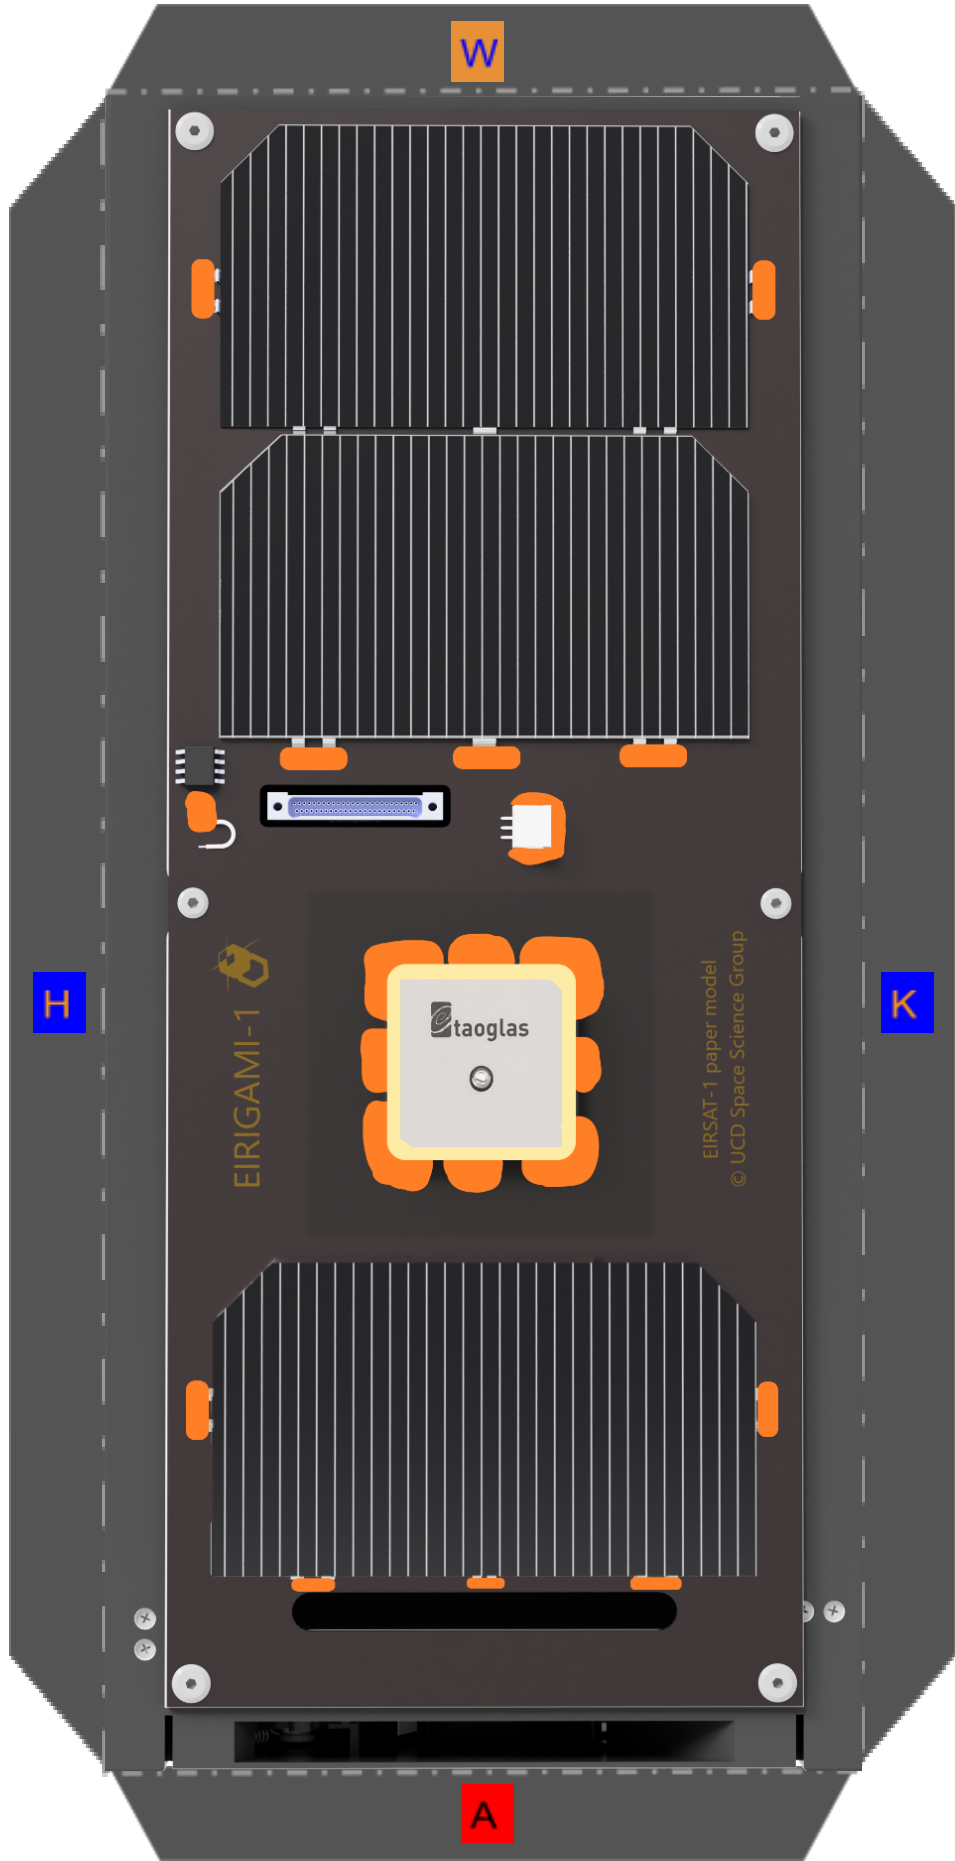

The EIRSAT-1 paper model

Assembly Instructions:

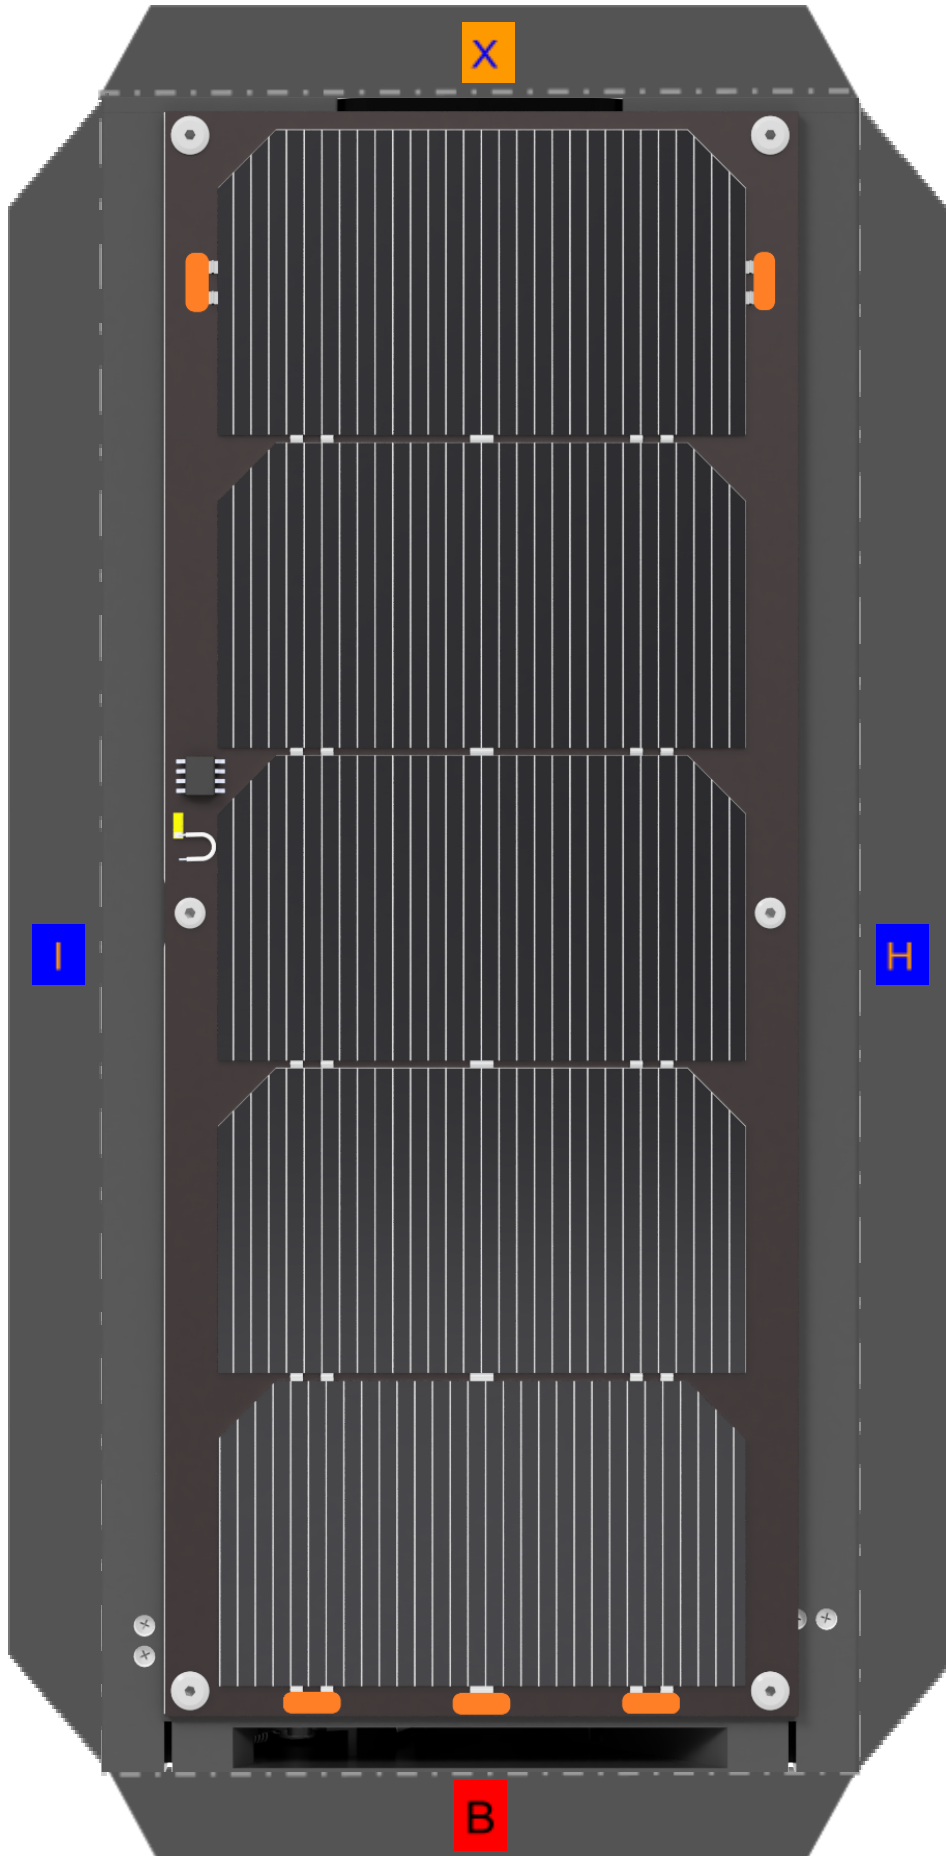

1. Cut out the coloured shapes (Faces 1 - 6) from the white background. Keep track of which ones are which by marking the back (blank side) of each face with its number.
2. Take each shape and fold along the dotted lines to make tabs.
3. All of the tabs have a coloured letter. There are pairs of coloured letters which match together.
4. Lay out faces 1 - 4 with the coloured side down so that the coloured letters on each tab are touching their matching letters.
5. Glue or tape the tabs on the faces 1 - 4 together so that the faces with the letters are touching. You should now have a cuboid with an open top and bottom.
6. Now take face 5. This will go on the bottom.
7. Glue or tape the tabs on face 5 to the tabs on the bottom of the cuboid. Make sure all the letters for each tab match. Reaching your hand down from the top might make it easier!
8. Now glue or tape the last remaining face (face 6) to the tabs on the top of your cuboid. This is the trickiest part, take your time!
9. You have assembled EIRSAT-1!
